DESCRIPTION:

Organizing animation activities and creating better living conditions for orphans Socio-Educatif Center in Morocco.

The volunteer project is organised in collaboration with the Socio-Educatif Center Sala Jadida, and the House of Culture –Mohammed Hajji Sala Jadida .

Work :

The volunteers will be organizing and running animation for children and Theater Excersises,plays . The project also aims to give a new look to the children's center which will include Painting,drawing,Singing...

The intercultural exchange sessions that will be organised during the Theater and animation Workshop program is an occasion offered by FCC to all the participants of the FCC, so as to present, exchange and discuss together the knowledge they got from their Program Activity.

Accommodation....

The volunteers will be accommodated in the orphanage, or a shared apartment or in host families (depending on availability). Staying with a host family is an opportunity for the participants to discover the Moroccan way of life. All the participants are expected to respect the families' environment and the local traditions; they are also expected to be sociable and open-minded so as to build good and fruitful communication with their hosts.

Location :

Sala Al Jadida is built on the set of common Hssain overlooking the valley of the Oued Bouregreg, where the quality of the climate is remarkable and the sea breeze mitigating the excess heat, it has the immediate vicinity of the forest Maâmoura and it is located at the intersection of North South motorway, a few kilometers from the airport of Rabat Salé, Sala Al Jadida benefits from direct connections, the new bypass that connects you to the center of Rabat 10 minutes.

Sala al Jadida has everything to make life easier for people. Thus all equipment is designed in conjunction with the apartments, the main administrations are in place: mail, police, perception ...

The road is of exceptional quality, parking, street lighting, are attractive, robust and built to last;

Sanitation, sewage systems, storm water, electricity and telephone are buried, which will not generate further work and which do not degrade the urban landscape.

The buildings are fully compliant with quality standards, both in materials used in the finishes, and even in seismic protection.
